

## Publication Ethics and Publication Malpractice Statement

The organisers and participants of the conference and the process of publishing articles conform to recognised best practises and guidelines and adhere to ethical standards. So, our publication ethics and publication malpractice statement are mainly based on the *Code of Conduct and Best-Practice Guidelines for Journal Editors* (Committee on Publication Ethics, 2011).

### Editors' responsibilities

The editorial team is responsible for deciding which of the papers submitted will be published. The editor will evaluate manuscripts without regard to the authors' race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy. The decision will be based on the paper's importance, originality and clarity, and the study's validity and its relevance to the journal's scope.

The editorial team participates in the community of users of the Similarity Check service for comparison purposes to ensure that the published content is original and reliable.

If there is a clear suspicion of fraud, the manuscript is rejected. By fraud is meant that the peer reviewer or editorial board finds that parts or all of the text have already been published elsewhere, that there are cases of plagiarism, or that there is suspicion that the data has been falsified.

The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Unpublished materials disclosed in a submitted paper will not be used by the editor or the members of the editorial board for their own research purposes without the author's explicit written consent.

### Reviewers' responsibilities

Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper. Peer review is an essential component of formal scholarly communication, and lies at the heart of the scientific method. So, the reviewers have an obligation to do a fair share of reviewing.

Any manuscripts received for review must be treated as confidential documents. They must not be disclosed to or discussed with others except as authorized by the editor.

Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

### Authors' responsibilities

Authors will submit only entirely original works, and will appropriately cite or quote the work and/or words of others. Publications that have been influential in determining the nature of the reported work should also be cited.

A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

Please note that authors retain all copyright to their contributions and should ensure that all who have made a significant contribution are named as co-authors to share full responsibility for the content of the contribution. The corresponding author should ensure that all appropriate co-authors are listed on the paper and that all co-authors have seen and approved the final version of the paper and agree to its publication.

All authors should disclose in their manuscript any financial support or material conflicts of interest that might influence the results or interpretation of their manuscript.

In this context, it is imperative that all parties involved in the publication process of the Proceedings of the 28<sup>th</sup> International Conference of Inventics INVENTICA 2024 - Science of Creativity adhere to the established principles of ethical publishing, and this applies to authors as well as reviewers and the editorial board.

#### **Open Access License and Statement**

All submitted manuscripts are peer-reviewed based on originality and scientific value, and those accepted will be published as Open Access Proceedings by Sciendo (De Gruyter), with ISBN and DOI numbers for conference proceedings and papers.

The Proceedings of the 28th International Conference – Inventica 2024 – Science of Creativity will provide free and full access to their content, available under the Creative Commons Attribution-Non-Commercial- Licence.

One of the advantages for authors of papers published in Open Access Proceedings is that citation tracking is guaranteed, and papers can be freely downloaded and cited. Details on abstracting and indexing the INVENTICA 2024 - Science of Creativity proceedings in various databases can be found on the Sciendo platform.
